CHOIX D'ASPECT | SCELTE | СОРТИРОВКИ | 不同的产品种类

2018 | 2019

Die Abbildungen in der Sortierungsmappe zeigen AUSSCHLIESSLICH das optische Erscheinungsbild des Parketts. Je nachdem wie viele Äste, welche Maserung oder wie hoch der Splintanteil ist, entscheidet über ein ruhiges oder lebhaftes Erscheinungsbild. Die Flächenbilder spiegeln daher weder die exakte Farbe, Fase noch die Veredelung wider.

Les photos dans le classeur de choix d'aspect représentent EXCLUSIVEMENT l'aspect visuel du parquet. Le nombre de nœuds, le type de structure ou la proportion d'aubier dénommés singularités naturelles font que l'aspect visuel est homogène ou contrasté. Les photos permettent un aperçu d'ensemble mais ne peuvent reproduire ni la couleur exacte, ni le veinage et encore moins le traitement de surface.

Le immagini del raccoglitore delle scelte presentano solo l'aspetto ottico del parquet. Dipende dalla quantità dei nodi o di alburno e dalle venature se il parquet si presenta elegante o vivace. Le immagini delle superfici non rispecchiano esattamente colore, bisellatura e trattamento.

The purpose of the grading book is to illustrate the optical appearance of the parquet and its possible variation. All features determining the different wood qualities such as knots, structure of grain, sapwood and others are shown when they apply. Grading pictures are not representative for the true colour of the wood and do not necessarily reflect surface treatments (e.g. brushing) and bevelling.

Иллюстрации в папке сортировок показывают ИСКЛЮЧИТЕЛЬНО оптический внешний вид паркета. В зависимости от того сколько сучков, какая текстура и какое количество заболони, внешний вид паркета будет либо спокойный либо более живой. Поэтому иллюстрации поверхностей не отображают точный цвет, фаску или отделку.

样品册上的例图只能表现实木复合地板的视觉外观。想要确定木板外观到底是素净的还是鲜明的，需要看有多少节孔，哪种纹理或者是白木质的含量高低。因此平面图片既不能反映确切的颜色，加工中产生的斜边，也不能反映抛光的效果。
